

WANT A WARM FEELING WHEN YOU LOOK IN THE MIRROR? ESKIMO INTRODUCES THEIR NEW RANGE OF HEATED STAINLESS STEEL MIRRORS.

As you should know, Eskimo radiators are both incredibly beautiful, coupled with the best and most efficient functionality. Beautiful, inside and out if you will. The new heated stainless steel collection is no exception, but is exceptional, and boasts twin functionality with high heat output.

*A high performance radiator and gorgeous mirror for gorgeous people**

Understanding that people and their interiors desire variety and often a need for something very different, the 'Mirror' range is available in a wide range of sizes and formats from full length mirrors to big wide fat things. Bespoke sizes can be created to suit absolutely any space.

They are gorgeously super high polished stainless steel. This gives a near perfect reflection giving it multi-function and opens up the room in which it exists, great for small spaces. Heated towel rails can be included.

Not only that but they are hard wearing and easily cleaned AND, wait for it, they don't fog up (anti-mist). We can hear the sighs of relief. And yes, available in both electric and hot water versions with hidden valves if you so specify.

* Eskimo mirror simply reflects what looks at it, beauty cannot be created where no beauty is present. Eskimo will not accept liability for ugliness of user. Eskimo mirrors can encourage slimming as part of a calorie controlled diet.

Product name - 'Mirror'

Materials – Highly polished stainless steel.

Prices vary according to size and form, from £572.00 to £1,597.00 + VAT
